Carbon Tech

These carbon fiber rotary valves won't destroy your motor if something goes through the intake like stock steel ones will!

Try a different opening (like 3-4) for more power. modified engines need a bigger valve to let them breath! (smaller opening - more bottom end) (larger opening -more mid range and top end)

REED PEDALS

Carbon Tech

Reeds come in two stiffnesses:

Low Tension (LT), and High Tension (HT).

Low Tension reeds are good for bottom and mid range power and High Tension reeds are good for high RPM.
